

Help the lesson survive the next round.

A simple golfer-owned card for one coach focus, one swing thought, one practice mission, one next lesson check, and one course reminder. Built to support coaches without replacing lesson software.

After Lesson	Save the short version	Coach focus, swing thought, practice mission, and next lesson check stay in one place before the student leaves.
Before Round	Open the reminder	The student sees the one thing to remember instead of searching text threads, screenshots, or notebook pages.
Course Mode	Mark proof	Expected, short, or long creates the bridge from instruction to what happened outside.
Next Lesson	Start from evidence	The pro sees what transferred, what failed, and which number the student should trust next.

Bay2Course is not coaching software, medical guidance, or a replacement for an instructor. It is a lightweight memory layer for the golfer. Review access: <https://bay2course.com/coach-memory-card>
