

Stop testing golf products from memory.

A simple record for balls, gloves, tees, shafts, wedges, grips, training aids, and fitting changes: old setup, new setup, sim number, feel note, outside proof, and keep-or-swap decision.

Product	What changed?	Save the item, old setup, new setup, source, and reason for testing.
Bay Number	What did the sim say?	Keep the visible launch-monitor number the golfer chooses to review.
Outside	Did it hold up?	Add course or range proof before the first impression fades.
Decision	Keep or swap	Turn a product impression into a clearer bag decision and creator talking point.
